DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 11 and 13-14, drawn to an automatic hose winding and unwinding apparatus with guide rollers, classified in class 242, subclass 397.2.
- II. Claims 1 and 6-7, drawn to an automatic hose winding and unwinding apparatus with a hose assistant pulling apparatus, classified in class 242, subclass 412.
- III. Claims 1 and 8-10, drawn to an automatic hose winding and unwinding apparatus with a rotation unit, classified in class 242, subclass 398.
- IV. Claims 1 and 12, drawn to an automatic hose winding and unwinding apparatus with a limit switch, classified in class 242, subclass 563.

Inventions Groups I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as winding and unwinding a hose using guide rollers. Invention II has a separate utility such as winding and unwinding a hose using a hose assistant pulling apparatus. Invention III has a separate utility such as winding and unwinding a hose using a rotation unit. Invention IV has a separate utility such as winding and unwinding a hose using a limit switch. Because these inventions are distinct for the

Art Unit: 3654

reasons given above and the search required for Group I is not required for Groups II, III and IV, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

Claim 1 link(s) inventions Group I, II, III and IV. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

If Applicant elects Group I, claims 1-5, 11 and 13-14 are directed to the following patentably distinct species of the claimed invention:

Species I – Figures 2-5.

Species II – Figure 13.

Species III – Figure 18.

Art Unit: 3654

Other figures show features of the invention which are common to all the species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
